

LUCY, 2020

In her interdisciplinary artistic research Anita Fuchs creates a combination of botanical, mineralogical but also conceptual methods and uses results of surveys, photos and documentary drawings for her works. From found objects, she creates new, transdisciplinary orders, images, sculptures and installations, in which she juxtaposes disciplines and interweaves them with each other in terms of content.

Human skeleton made  
from fossilized plants\*, 172 x 45 cm

\*Leaf-assemblages of the Upper Miocene flora from the (Mataschen) clay pit.

Carbonized remains of a swamp forest with majority evergreen plants.

*"Pteris" oeningensis, Glyptostrobus europaeus, Juglans acuminata, Myrica sp., Salix holzeri vel Salix varians, Rhizocaulon sp., Zingiberoidophyllum liblarens*
